Toxicology letters

Volume contents

Volume 72 (1994)

Preface xi

What research for which policy in the field of health and environment
G.M. van Etten, J.A.M. Hulshof (The Netherlands) 1

Multistage carcinogenesis utilizing human genital cells and human papillomaviruses
J.A. Di Paolo, N.C. Popescu, D.V. Ablashi, P. Lusso, D.B. Zimonjic, C.D. Woodworth (USA) 7

Activation of promutagens by endogenous and heterologous sulfotransferases expressed in continuous cell cultures
H. Glatt, K. Pauly, A. Piée-Staffa, A. Seidel, S. Hornhardt, A. Czich (Germany) 13

Inhibition of phagocytosis of human macrophages induced by airborne particulates
W. Hadnagy, N.H. Seemayer (Germany) 23

Method for the description of differences in the filamentous structure of the cytoskeleton in cultured cells
M. Kohler, M. Aufderheide, D. Ramm (Germany) 33

Nuclear accumulation of p53 in response to treatment with DNA-damaging agents
R. Hess, B. Plaumann, A.S. Lutum, C. Haessler, B. Heinz, M. Fritsche, G. Brandner (Germany) 43

Toxicity of monocyclic and polycyclic nitroaromatic compounds in a panel of mammalian test cell lines
M.M. Perchermeier, F. Kiefer, F.J. Wiebel (Germany) 53

Neuroendocrine phenotype differentiation in a hamster lung epithelial cell line under low oxygen pressure or after transformation by diethylnitrosamine
M. Emura, A. Ochiai, A. Gobert-Bohlen, B. Panning, D.L. Dungworth (Germany and USA) 59

Comparison of biological effects of different polycyclic aromatic hydrocarbons in lung cells of hamster and rat in vitro
J.W. Knebel, M. Aufderheide, M. Emura (Germany) 65

Effects of outdoor and indoor airborne particulate matter on thyroid hormone and vitamin A metabolism
G.M. Alink, A. Brouwer, G.A.H. Heussen (The Netherlands) 73

Airborne mutagens and carcinogens from cooking and other food preparation processes
G. Löfroth (Sweden) 83

Inhibition of gap-junctional intercellular communication by outdoor and indoor airborne particulate matter
G.A.H. Heussen, G.M. Alink (The Netherlands) 87

Comparative genotoxicity testing of airborne particulates using rodent tracheal epithelial cells and human lymphocytes in vitro
N.H. Seemayer, C. Hornberg, W. Hadnagy (Germany) 95

0378-4274/94/$07.00 © 1994 Elsevier Science Ireland Ltd. All rights reserved.

DNA adducts in hamster and rat tracheas exposed to benzo(*a*)pyrene in vitro
R. Roggeband, A.P.M. Wolterbeek, P.T.M. van den Berg, R.A. Baan (The Netherlands) 105
Photochemical decompositon of organic compounds in water after UV-irradiation: investigation of positive mutagenic effects
I. de Veer, H.-J. Moriske, H. Rüden (Germany) 113
Pulmonary retention and clearance of particles
J. Ferin (USA) 121
In vivo and in vitro studies of the cellular defense system of the human lung
W. Stahlhofen, W. Möller (Germany) 127
Experimental data for total deposition in the respiratory tract of children
Ch.F. Schiller-Scotland, R. Hlawa, J. Gebhart (Germany) 137
Morphologic effects of a sulfur(IV) aerosol on the nasal cavity of beagle dogs
S. Takenaka, G. Fürst, P. Heilmann, A. Heini, U. Heinzmann, E. Karg, A.B. Murray, L. Ruprecht, J. Heyder (Germany) 145
A role for cellular immunity in the induction of airway hyperresponsiveness induced by small molecular weight compounds
J. Garssen, F.P. Nijkamp, H. van der Vliet, H. van Loveren (The Netherlands) 151
Estimation of a lifetime unit lung cancer risk for benzo(*a*)pyrene based on tumour rates in rats exposed to coal tar/pitch condensation aerosol
U. Heinrich, M. Roller, F. Pott (Germany) 155
Human exposure to complex mixtures of air pollutants
J. Lewtas (USA) 163
Exposure of bus and taxi drivers to urban air pollutants as measured by DNA and protein adducts
K. Hemminki, L.F. Zhang, J. Krüger, H. Autrup, M. Törnqvist, H.-E. Norbeck (Sweden and Denmark) 171
7-Methyldeoxyguanosine as a marker of exposure to environmental methylating agents
F. Bianchini, C.P. Wild (France) 175
Comparison of chromosome aberrations and micronuclei in testing genotoxicity in humans
A. Forni (Italy) 185
Assessment of occupational exposure to diesel exhaust. The use of an immunoassay for the determination of urinary metabolites of nitroarenes and polycyclic aromatic hydrocarbons
P.T.J. Scheepers, H.J.T.M. Thuis, M.H.J. Martens, R.P. Bos (The Netherlands) 191
Macromolecular adducts in the use of methyl bromide as fumigant
H.W. Goergens, E. Hallier, A. Müller, H.M. Bolt (Germany) 199
Biological monitoring of environmental exposure to polycyclic aromatic hydrocarbons; 1-hydroxypyrene in urine of people
F.J. Jongeneelen (The Netherlands) 205
Health problems of the population in different regions of the Ukraine
A.A. Kuchuk (Ukraine) 213
Pediatric problems in Upper Silesia — region of ecological disaster
I. Norska-Borówka (Poland) 219
Acute respiratory effects of summer smog in primary school children
C.E.J. Cuijpers, G.M.H. Swaen, G. Wesseling, E.F.M. Wouters (The Netherlands) 227
Risk assessment: good for health?
J.A.G. van de Wiel, W. Passchier (The Netherlands) 237
Ozone-induced lung toxicity: mediated by ozonides?
J. de Vries, R.A. Hempenius, I.M.C.M. Rietjens (The Netherlands) 243
Airway responses during and directly after single-time exposure to ozone
A. Zwart, J.H.E. Arts (The Netherlands) 247
Biochemical and histopathological changes in nasal epithelium of rats after 3-day intermittent exposure to formaldehyde and ozone alone or in combination
F.R. Cassee, V.J. Feron (The Netherlands) 257
The toxicity of air pollution in experimental animals and humans: the role of oxidative stress
D.B. Menzel (USA) 269

Ozone-induced inflammation and altered ventilation in genetically susceptible mice: a comparison of acute and subacute exposures
C.G. Tankersley, S.R. Kleeberger (USA) 279
Attenuation of acute lung injury by ozone inhalation — the effect of low level pre-exposure
W.A.A. van der Wal, L. van Bree, M. Marra, P.J.A. Rombout (The Netherlands) 291
Biological activity of respirable industrial fibres treated to mimic residence in the lung
K. Donaldson (UK) 299
Combined influence of quartz dust, ozone and NO_2 on chemotactic mobility, release of chemotactic factors and other cytokines by macrophages in vitro
G. Polzer, I. Lind, M. Mosbach, A. Schmidt, A. Seidel (Germany) 307
Use of asbestos, health risks and induced occupational diseases in the former East Germany
W. Sturm, B. Menze, J. Krause, B. Thriene (Germany) 317
Lead concentration in tap-water and in blood of selected schoolchildren in Southern Saxonia
N. Englert, H. Höring (Germany) 325
Interactions in metal carcinogenicity
D. Beyersmann (Germany) 333
Importance of species differences in experimental pulmonary carcinogenicity of inhaled cadmium for extrapolation to humans
G. Oberdörster, M.G. Cherian, R.B. Baggs (USA and Canada) 339
Risk estimation of mercury intake from different sources
F. Schweinsberg (Germany) 345
Mechanisms in nickel genotoxicity: the significance of interactions with DNA repair
A. Hartwig, I. Krüger, D. Beyersmann (Germany) 353
Effects of UV-B on the resistance against infectious diseases
W. Goettsch, J. Garssen, F.R. De Gruijl, H. Van Loveren (The Netherlands) 359
Consumption of drinking water with high nitrate levels causes hypertrophy of the thyroid
J.M.S. van Maanen, A. van Dijk, K. Mulder, M.H. de Baets, P.C.A. Menheere, D. van der Heide, P.L.J.M. Mertens, J.C.S. Kleinjans (The Netherlands) 365
Swimming pool chlorination: a health hazard?
H. Aiking, M.B. van Acker, R.J.P.M. Scholten, J.F. Feenstra, H.A. Valkenburg (The Netherlands) 375
